DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "or thereabout" in claim 6 is a relative term which renders the claim indefinite. The term "or thereabout" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 & 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Levy (U.S. Patent 5673028).

With reference to claims 1-5, Levy discloses an apparatus (10) comprising a unit (14) which is recoverable and reusable after use, said apparatus further comprising an environmental history indicator member (20) disposed to be mounted and dismounted inside said unit or adjacent, having environmental resistivity less than the environmental resistivity of the unit, said environmental history indicator member having a light

transmitting property (col. 14 lines 56-61) variable according to an environmental history, in accordance with temperature and/or humidity, of use to the apparatus and being arranged not to participate in any functions of said apparatus during use of said apparatus, wherein the light transmitting property deteriorates over time to assume and maintain a state of deterioration (Figure 8).

With reference to claims 7-9, Levy discloses a management system wherein said process to be applied to said unit is determined as to whether said unit is to be reused as it is, or to be reused after repair/cleansing, or to be removed/recycled according to a result of measurement by an inspection, of the property of said environmental history indicator member (col. 9 lines 60-64).

Allowable Subject Matter

5. Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
